

# MUNDER SKILES

## **METAL FURNITURE CARE**

Our metal furniture is made from the highest quality metal alloy and paint. Our craftsmen work hard to create furniture that is both comfortable and unique.

Our metal furniture is intended to remain as trouble free as possible, and in most circumstances, it can remain outdoors year round. We recommend keeping the pieces in a covered area as much as possible, especially when nature is dealing her harshest blows. For those without space, we recommend our waterproof covers that easily slip on when the weather dictates. We like to think of covers as insurance that protects your investment over the long-term. In addition, the covers are also handy for keeping your chairs clean from weekend to weekend during the warmer months.

Though it does not react to the environment in the same way as some woods, you should expect some reaction as metal is exposed to wind, sun, rain, snow, heat and cold. Metal, unlike wood, conducts both heat and cold, so be aware of its placement, and yours!

## **GENERAL CLEANING**

Wiping down the metal with a damp cloth to remove surface grime will prolong the life and look of the painted finish. Do not use any stiff or wire brushes as this will compromise the paint.

If your furniture is near the sea, we may have suggested making it in Aluminum or Stainless Steel which are both more resistant to rust and corrosion. However, surface maintenance is still required.

We appreciate your purchase and want you to be completely satisfied.

*If you look good.. we look good, and we thank you for that!*
