

Furniture Covers

Outdoor furniture covers need to breathe so that moisture can escape, keeping mold and mildew from developing under the cover. Munder-Skiles uses technologically advanced materials that are one-way breathable - moisture leaves, but dust and dirt can't get in. Water resistant and breathable, these covers are truly unique and the best that you'll find to protect fine outdoor furniture.

Made with state-of-the-art fabrics, our covers are stronger than most vinyl covers, yet light weight. This means our covers are easy to use - no struggling to get them on and off. They are able to handle temperatures from -100 degrees Fahrenheit up to +240 degrees

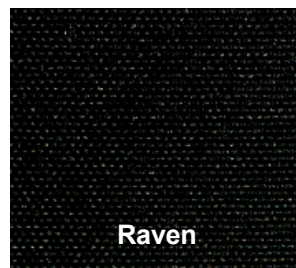

The fabric retains its color and strength in severe outdoor exposure yet still provides a beautiful, rich appearance.

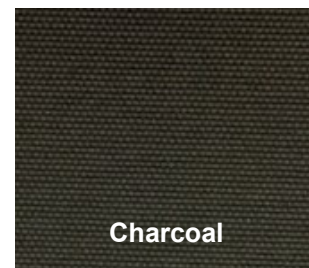

Linen

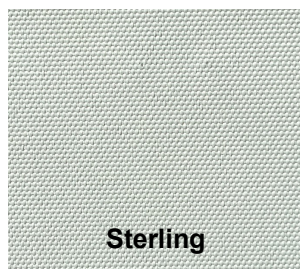

Navy

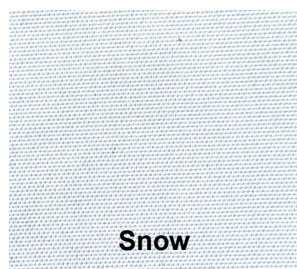

Raven

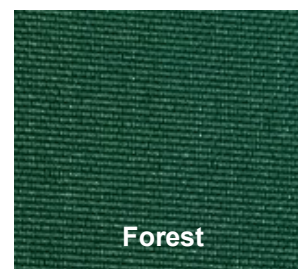

Charcoal

Sterling

Snow

Forest

Due to monitor and printer color differences, Munder Skiles recommends requesting a physical finish sample to verify your color choice.
